Device Edition

# Let's Play Digital Photo Roundup!

**Congrats on making the decision to start organizing your digital photos!** I know the task can seem daunting, so hopefully this handy checklist will help get your moving in the right direction.

## LET'S ORGANIZE!

To start organizing your digital photos, you must first gather them all into one place, so that you'll be able to sort and edit your collection. Use this checklist to document where your family's digital photos are (i.e. the ones that are NOT online), and whether they are copied onto your Master hub (the place where you are saving EVERYTHING) or not. It'll make the gathering process a whole lot easier if you keep a record of what you have already copied and what is still to be done.

## HERE'S HOW

The services in this checklist are categorized, so that you only need to print out what applies to you. If you have the device listed, simply check the "*Have Device*" box. When you have copied all the photos, check the "*Photos Copied*" box. If you have any passwords for any of your devices, enter those under the line between the boxes for easy retrieval.

If you don't see your favorite device on the list, just add it to one of the blank lines on the last page. Once you are done, you should find yourself with all your digital images in ONE place, and when you do, check back on the blog for tools to help you with the next step in the organizing process.
